ABOUT CLAUSING LASERGEAR

Entry-Level Laser Marking Systems Manufactured in the USA
Clausing LaserGear is a full featured, entry-level line of laser marking products from Clausing, a world leader in industrial machine tools. Clausing LaserGear was created to serve clients who desire an entry-level laser marking system without compromising on quality. Clausing LaserGear products are manufactured in the USA, using high quality components and are backed by an 18-month warranty with an industry leading complete replacement policy. If your system is down within the warranty period, simply contact Clausing and we will replace it with a new unit.

APPLICATIONS

Laser Mark, Engrave, and Etch a Variety of Materials
Clausing LaserGear systems mark all metals, most plastics, carbide, anodized aluminum, painted/coated materials, and more. Powerful MOPA fiber laser technology enhances the marking capabilities and reliability over basic q-switched fiber laser systems.
CLAUSING LASERGEAR CPBQX20

A Powerful Class I Benchtop Laser Marking System

Clausing LaserGear CPBQX20 is a Class 1 benchtop laser marking system that combines simplicity with power.

Featuring a 20W MOPA fiber laser, CPBQX20 delivers both strength and speed to accomplish a variety of applications. A front sliding vertical door and power focal height adjustment with a built-in focus finder tool allow for simple front loading and part setup. Simply connect a laptop or desktop PC via USB and begin programming in our Minilase Pro SE software.

Features
- Class I safe benchtop laser enclosure
- Front operator control buttons
- Front sliding vertical door
- 20W MOPA fiber laser
- Power focal height adjustment with focus finder tool

Note: shown with optional 3-jaw chuck
CLAUSING LASERGEAR CPB20
Ideal for Class IV Tool Post Use or Integration Applications

Clausing LaserGear CPB20 is a Class 4 laser marking system that is ideal for use in an open environment or integrated into production lines.

Featuring a 20W MOPA fiber laser, CPB20 delivers both strength and speed to accomplish a variety of applications. Mount CPB20 to a tool-post for marking applications which require open space and flexibility. Integrate CPB20 into automated lines for unattended or turnkey applications. Connect a laptop or desktop PC via USB and begin programming in our Minilase Pro SE software.

Features
- Class IV integration laser marking system
- Compact head design and controls enclosure
- 20W MOPA fiber laser
- I/O for automated system control

CLAUSING LASERGEAR CPB60
CPB60 Features More Power

CPB60 adds more power and selectable pulse durations for advanced marking capability, with improvements to speed, flexibility, and deep engraving.

Features
- 60W MOPA Fiber Laser
- 8 Selectable Pulse Durations
**LASERGEAR MARKING SOFTWARE**

With our user-friendly software, operators and engineers can quickly create marking files with text, barcodes, 2D codes, and a variety of graphic formats such as DXF, AI, PLT, BMP, and JPEG. CAD tools allow users to draw their own graphics and manipulate complex vector files. Automated date coding and serialization capabilities are also included. A pre-configured materials library takes the guess work out of setting up laser marking parameters. Control a rotary device for 360° marking.

**LASER CONTROL CENTER**

Advanced machine control is included with our Clausing LaserGear CPBQX20 Laser Control software module. Control and change the machine z-axis height, view activity logs, and more using your laser programming PC.

**MR65 ROTARY**

The MR65 is a robust, compact rotary axis ideal for 360° radial laser marking. The unit features a manual three jaw holding chuck along with multi-diameter fingers for holding the ID or OD of components. A tilting feature enables marking on complex angles or inner diameters.

**HANDHELD CONTROL PENDANT**

The handheld control pendant is available for all Clausing LaserGear products and features advanced system control such as: Start/Stop Marking, Shutter Control, Laser On/Off Status, Busy Status, Cycle Complete Alert, Z Axis Control (CPBQX20), Laser Temperature and Serial Information, and Warnings and Error Messages.

**TOOL POST**

Our manual tool post allows provides secure mounting and focal height adjustment for the Clausing LaserGear CPB20 product. A baseplate with through holes allows for fixture mounting and part presentation.

**FUME EXTRACTION**

A variety of fume extractor products are available to remove harmful dust, debris, and fumes created by the marking process.

**LASER SAFETY GLASSES**

For safety in Class IV operation.

TRAINING & SUPPORT

Clausing LaserGear products are designed to setup and install with minimal effort. Every system ships fully assembled for quick startup. With our startup manuals, training videos, and more, users can easily setup and program Clausing LaserGear products on their own.

Clausing pledges to provide every customer with laser systems of the highest quality and reliability. We offer applications specialists available from the start.

We’re dedicated to providing long-term customer problem resolution and training to ensure your system operates effectively for years to come. Contact us today to learn more. Join the growing number of manufacturers who’ve chosen Clausing as their partner in industrial laser systems.
