SURFACE GRINDERS

A Line of Precision Low-cost, High Performance Surface Grinders

- Precision Manual Surface Grinders
- Precision Hydraulic Surface Grinders
- Precision Automatic Surface Grinders
CLAUSING PRECISION 618 & 818 SERIES

Manual Surface Grinders (H Models)
Longitudinal Hydraulics and Motorized Crossfeed Surface Grinders (2A Models)
Longitudinal Hydraulics, Motorized Crossfeed and Motorized Rapid Up/Down Surface Grinders (3A Models)

Features

High Precision Cartridge Spindle
- High precision cartridge type spindle is supported by 2 preloaded precision angular contact ball bearings & one NN type roller bearing and driven by V3 class motor that allows high accuracy grinding performance.

Anti-wear Guide Ways
- The saddle rests on precision hand-scraped double V ways & the table rests on precision hand-scraped V & flat ways which are coated with ‘TURCITE-B’. These guide ways are equipped with auto lubrication to resist wear for lasting accuracy and dampening. CSG618/818 hand feed grinders have ballways between table and saddle.

Rigid Cast Construction
- Machines are constructed of high grade cast iron with heavy walls & reinforced ribs to provide excellent rigidity and dampening.

Enlarged Column & Base
- Enlarged column & base create high stability & rigidity. The maximum height is 18” (460mm) from table surface to the center line of spindle.

Auto Lube System
- Automatic lubrication system is supplied as standard to ensure sufficient lubrication to lead-screws & guideways for greater longevity.

Timing Belt Table Drive
- Handfeed models (CSG618/818 only) use a timing belt for the table drive which has enclosed high tensile steel cores that ensure more smooth table movement and longevity. The table handwheel can be indexed to 9 different positions, without backlash, for more convenient operation.

Longitudinal & Cross Drive
- On 2A and 3A the longitudinal movement is driven by a hydraulic system. The cross movement is driven by servo motor for more accurate increment feeding.

CLAUSING PRECISION 10-12-16 SERIES

Longitudinal Hydraulics and Motorized Crossfeed Surface Grinders (2A)
Longitudinal Hydraulics, Motorized Crossfeed and Motorized Rapid Up/Down Surface Grinders (3A)

Features

Column
- Wide, deep base & honeycomb ribbing are especially suitable for heavy duty grinding.

Construction
- Table, saddle and base are cast from high grade iron, and strong ribbing for better accuracy.

Spindle
- Large diameter spindle is supported by four preloaded precision angular contact ball bearings and one NU Type Roller bearing for durable, heavy duty operation.

Enlarged Column & Base
- Enlarged column & base create high stability & rigidity. The maximum height is 18" (460mm) from table surface to the center line of spindle.

Slideways
- Vertical, cross (double V's) and longitudinal (V & flat) slideways are coated with Turcite-B, to provide stable movement, durability, and accuracy.

Automatic Continuous Lubrication System
- All slideways and screws are fully oiled by automatic continuous lubrication system to minimize wear on slideways & screws.

Cross Feed
- Ball screw for cross travel, powered by AC motor.

Proximity
- Has a built-in type (hidden) proximity switch for easy operation.

Table Speed Control
- Presettable hydraulic table speed control allows operator to pre-set speed rate, enables you to have same speed rate when engaging hydraulic table every time. 12 and 16 models have a dual throttle valve for 25mm to 25M Longitudinal speeds.

CLAUSING PRECISION ASDIII AUTOMATIC SURFACE GRINDERS

ASDIII SERIES OPERATION PANEL

Delta PLC Digital Control features a 7.2” color touch screen and is equipped with the exclusive EQUIPTOP Conversational mode working system, easy to learn and operate.

Features

- On ASDIII models, you can set the vertical zero point, start point, finish grinding volume, target point and the grinding wheel rise-up point.
- The machine features a simple and clear digital display & touch control panel for easy learning and operation.
- Vertical feed powered by dual motors, AC motor for rapid up / down and stepping motor for microdownfeed positioning, slow auto downfeed and slow up / down.
- Vertical positioning is displayed on the screen showing present spindle and setting the start point, rough grinding volume, finish grinding volume, downfeed volume for finish grinding, target point, rise up point, intermittent spark-out.
- Cross transverse travel powered by DC servo motor, allows step feed and continuous infeed grinding.
- The speed of wheel dressing can be adjusted on the control panel.

- Wide, deep base and honeycomb ribbed column on 10, 12, 16 & 20 series, designed for heavy-duty grinding.
- High quality, ribbed, cast iron table, saddle and base.
- All slideways and screws are fully oiled by an automatic continuous lubrication system to minimize wear on slideways & screws.
- High Grade Anti-Wear Slideways... The saddle rides on precision, hand-scraped double V ways, and the table rides on precision hand-scraped V and flat ways coated with “TURCITE-B”.
- Precision spindle cartridge, supported by preloaded precision angular contact ball bearings and one NU type roller bearing. 618 and 818 have one NN type roller bearing instead of NU.
- Presettable hydraulic table speed control allows operator to pre-set speed rate, so you can have the same speed rate every time the hydraulic table is engaged (10 thru 20 series).
- Ballscrew for cross travel, powered by DC servo motor.

CLAUSING LARGE CAPACITY PRECISION ASDIII AUTOMATIC SURFACE GRINDERS

ASDIII SERIES OPERATION PANEL
Delta PLC Digital Control features a 7.2" color touch screen and is equipped with the exclusive EQUIPTOP Conversational mode working system, easy to learn and operate.

Features
- Large capacity up to 32" x 120" (810 x 3050mm) Table
- Enlarged extra strong ribbed column, ideal for heavy-duty grinding.
- Table, saddle and base are constructed of high grade cast iron and ribbed for maximum strength.
- Spindle is supported by 4 front and 2 rear precision angular contact ball bearings.
- All slideways and ballscrews fully oiled by an automatic continuous lubrication system to minimize wear on slideways and ballscrews.
- Longitudinal hydraulic transverse with constant speed function or manual speed handle. Table rides on double V slideways coated with "TURCITE-B" for maximum stability.
- Cross traverse travel powered by DC servo motor and ballscrew, allows step feed and continuous infeed grinding.
- Vertical positioning by precision ballscrew.
- Pre-set hydraulic table speed control allows operator to pre-set table speed rate and maintain the same speed rate every time the hydraulic table is engaged.
